## Corporate Profile & Philosophy

### Corporate Profile

Founded in 1990 (**MEMCO**) is the parent company in our group. We are specialized in the design and planning of facilities for commercial offices, corporate, aviation, health, education, transport, retail, residential, hospitality, sport and leisure, telecommunications and commercial clients in the private and public sectors.

In 2001, we expanded our business to Dubai and the Northern Emirates through our sister company **MEMCO Engineering company**. Through this network, we service our clients regionally.

### Our Philosophy

**MEMCO** clients expect clever, innovative design and planning solutions.

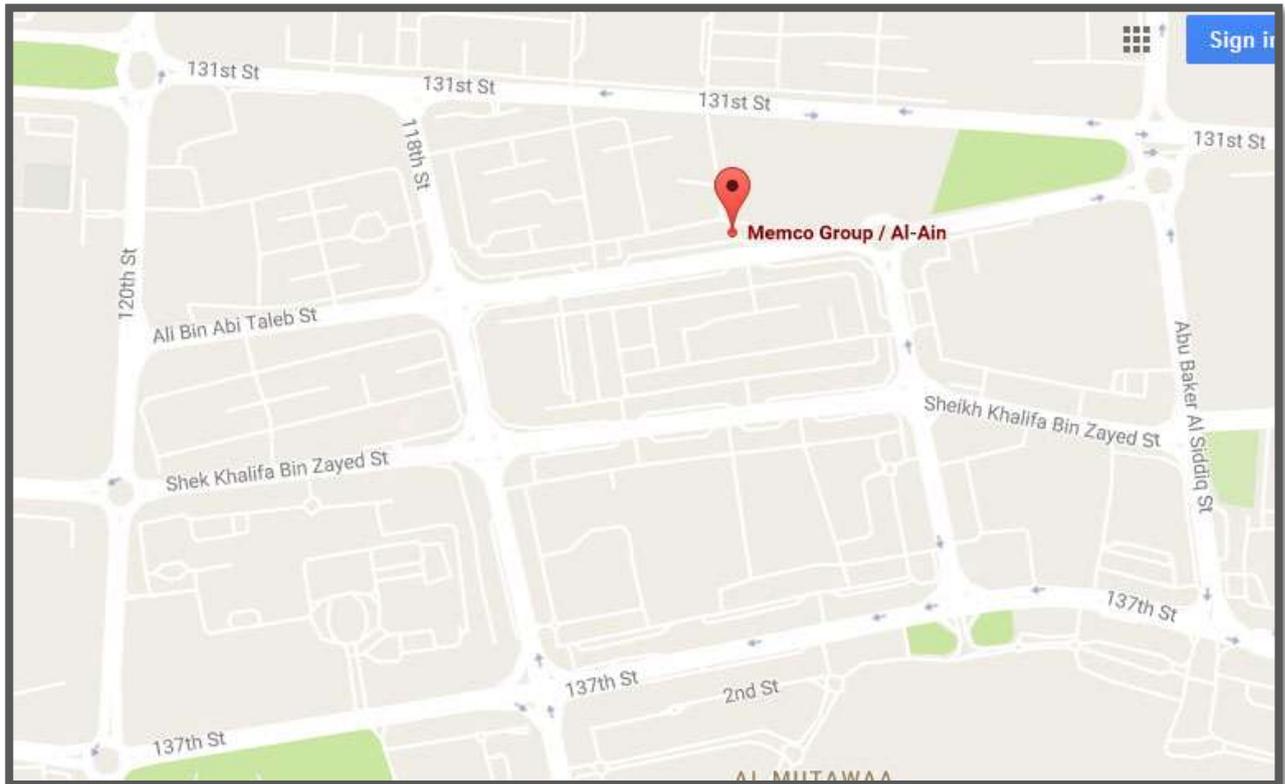

Our mission is to exceed that expectation. We achieve this through developing long-term relationships with our clients, through teamwork and through maintaining leadership in the application of technology to our business.

Wherever we operate, we offer personal and locally integrated products and services, which respect local culture, tradition and law. Our services are supported by specialization, financial strength and human technical resourcing, afforded by our professional network.

## About Our Firm

**MEMCO** is an electrical / mechanical contracting group, based in the Middle East. The quality of our service products and their reliable delivery are fundamental to the projection of a culture of excellence and the sustainability of our company. The objective of this management system is to provide a basis for quality and for continuing improvement in our standards of performance, levels of service and our products. The implementation and ongoing development of the system is the responsibility of all partners, managers and staff.

This experience has been documented within our formal and informal procedures and provides a key contribution to our reputation for achieving quality design and high professional standards.

The objectives of our formal management system form an integral part of our business plan. Our aims are:

- To critically assess invitation and tenders for suitability.
- To establish the project correctly on day one with the right team on the right project with infrastructure clearly identified and planned.
- To formally review projects at key stages and to confirm that our designs and services meet the project brief whilst ensuring that changes are identified and addressed quickly and effectively.
- To bring the project to a successful conclusion and critically appraise the project against the clients' expectations as well as those of our own.
- To build and project a culture of consistently high quality.
- To have our professional services seen as being world class.

## Our Expertise

**MEMCO's** expansive portfolio of completed and current projects records the achievements of a professional practice in its many years of operation.

Since 1990, **MEMCO** has acquired a history of significant commercial, institutional, governmental and industrial projects. These illustrate our diversity and ability to specialize under all conditions, which has made us a unique design force.

Importantly, we recognize that our future depends on giving to each of our clients a commitment to long-term personal and professional involvement. Accordingly, we get to know our clients, their organizations and their operating environment, and work with them to create innovative and value-added solutions to their facility needs.

We have executed projects like five star hotel, hospitals, residential & commercial complexes, high rise buildings, industrial facilities, helipad lighting, 11KV H.V networking with switching stations & ring main substations. Also, low current systems like building management systems, structured cabling, fire alarm systems, CCTV systems, access doors, P.A systems & queue management.

## Managing and Planning Projects

**MEMCO's** management system is critical to the ultimate satisfaction of our clients' requirements, and is central to balancing project objectives. Quality Assurance, or "getting it right the first time", depends upon communication, team building, training, monitoring, and supervision, and above all, commitment to consistently high quality. We have been managing for many years and we have built up an enormous amount of experience including the best way of getting the job done – simply and effectively. This experience has been documented within our formal and informal procedures and is a key contribution to our reputation for achieving quality design and high professional standards.

The objectives of our formal management system form an integral part of our business plan. Our aims are:

- To critically assess invitation and tenders for suitability.
- To establish the project correctly on day one with the right team on the right project with infrastructure clearly identified and planned.
- To formally review projects at key stages and to confirm that our designs and services meet the project brief whilst ensuring that changes are identified and addressed quickly and effectively.
- To bring the project to a successful conclusion and critically appraise the project against the clients' expectations as well as those of our own.
- To build and project a culture of consistently high quality.
- To have our professional services seen as being world class.
